Insurent hits another milestone.

Insurent Agency Corporation has recently formed new alliances that increase the total number of residential units accepting Insurent's Lease Guaranty Program to more than 70,000. These units are spread across nearly 700 apartment buildings in NYC.

The Lefrak Organization, Related Management, B&L Management, Skyline Developers, David Frankel Realty, New Park Management, S&H Equities, Magnum Real Estate, and Goodstein Management are among the organizations who have recently elected to accept Insurent, a resource that allows them to secure creditworthy renters and close leases quickly. As many as one quarter of prospective renters entering the New York market each year do not meet the minimum financial requirements of the city's landlords.

Insurent eliminates the risk of rent loss by replacing the system of individual parent/co-signer guaranty pledges, additional security, or prepaid rent with an institutional guarantor.
